

5 Product of Good design

1. Stapler

It is easy to use and has grip on top of it so that person can easily staple things.

2. Ball point pen

It is good in design after ink pen. If the ink will over then we can insert refil to it and this can be reuse.

3. Study table

This design is really amazing as people can study or do work in the bed. It can be fold. We can keep water bottle as well and it has space for keeping tab or phones in that horizontal space.

4. Wall Stick Hook

We can place this hook anywhere where we want and hang things on it.

5. Safety Pin

It is good design as it is useful in many ways. We all have a pile of safety pins scattered in some draw in our homes. They are one of life's useful products.

5 Product of Bad design

1. Surgical mask

It is very thin and in covid situation it's not safe to use because it can affect people.

2. Door design

It is really a bad design as people get confuse wheather to push/pull the door.

3. Toothpaste tube

It is not a good design as there have many paste left inside the tube and we can't use them completely.

4. Cup

I think it's a bad design as we can't drink from this cup because while drinking it can cause damage to our eyes.

5. Kitchen drawer

Drawer is not made properly. We can't open because of the handle of other drawer. It sticks in between and we can't take out the things easily.
